

Company Overview

We manufacture high-quality closed-die steel forgings for critical applications where performance and reliability are essential. Backed by experienced engineers, advanced forging capabilities, and rigorous quality standards, we deliver precision-engineered components from prototype through production that meet demanding aerospace, defense, and industrial requirements.

CORE COMPETENCIES

- Closed-Die Steel Forgings
- Advanced Forging Processes
- In-House Engineering Support
- Rigorous Quality Standards
- Prototype Through Production

DIFFERENTIATORS

- ✓ Decades of forging experience
- ✓ Defense and mission-critical focus
- ✓ In-house engineering
- ✓ Quality and on-time delivery
- ✓ Reliable manufacturing partner

MARKETS SERVED

- Defense • Military Vehicles • Aerospace • Industrial
